

Island Pathways Proposal for the Sweeping of Ganges Road Shoulders by a Bicycle Towed Electric Shoulder Sweeper

1. Routes/Streets to be swept to be determined by the CRD.

2. How often...we propose sweeping on a two week basis (?) with frequency adjusted for seasonal variations.
 - (a) Sweeping from Booth Canal to the the top of the Ganges Hill and back
(one sweep only, no disposing of debris just sweeping: 2 hours every 2 weeks.
 - (b) Adding one sweep all the way to Central and back (from Booth canal):
add another 1/2 hour

3. Disposal of swept material to be determined by the CRD.

Disposing of debris: anywhere from 1/2 hour to 2 hours depending on location...CRD responsibility or IP?

4. Sidewalks, minor street entrances, & driveways entrances could be addressed by electric leaf blowers???

5. IP providers are covered by our insurance.

6. Funding? \$500/month
