Environmental Resource Management

ENVIRONMENTAL SERVICES COMMITTEE REVIEW

Service: 1.521 Environmental Resource Management Committee: Environmental Services

PARTICIPATION:

All costs recovered through tipping fees & Sale of Goods and Services.

MAXIMUM LEVY:

No requisition

MAXIMUM CAPITAL DEBT:

Authorized:	LA Bylaw 3518	12,270,000	Authorized:	LA Bylaw 4515	36,000,000
Borrowed:	SI Bylaw 3547	(2,000,000)	Borrowed:	SI Bylaw 4562	(7,450,000)
	SI Bylaw 3677	(2,500,000)		SI Bylaw 4597	(4,300,000)
	SI Bylaw 3769	(2,200,000)		SI Bylaw 4621	(5,500,000)
	•	·		SI Bylaw 4659	(4,900,000)
				SI Bylaw	(3,500,000)
Remaining:	Expired May 14, 2013	\$5.570.000	Remaining:	•	\$10.350.000

Total debt outstanding (LA3518) at Dec 31, 2025 \$188,501 Final debt payments (LA3518) in 2026.

Total debt outstanding (LA4515) at Dec 31, 2025 \$24,359,696 Final debt payments (LA4515) in 2040

COMMISSION:

OPERATING COSTS - REFUSE DISPOSAL:

To be recovered through user fees & sale of goods and services

RESERVE FUND:

Solid Waste Refuse Disposal Reserve Fund, Bylaw No. 2164 (Sept. 8, 1993). Waste Reduction Sustainability Operating Reserve Fund Bylaw No. 3867 (Nov 14, 2012).

Change i Service:	n Budget 2025 to 2026 1.521 & 1.525 ERM	Total Expenditure	Comments

	Balance of increase	0.6%	
	% expense increase from 2025:	-2.3%	

Overall 2025 Budget Performance

(expected variance to budget and surplus treatment)

% Requisition increase from 2025 (if applicable):

Overall Solid Waste Tipping Revenue for 2025 is forecasted to lower than budget by \$0.8 million. RNG sales revenues lower due to the delayed completion time of the RNG plant. Landfill Operations/Diversion Services/Energy Recovery services expenses are forecasted to be lower than budget for 2025 by \$3.7 million. The estimated year-end transfer to the Capital Reserve Fund will be reduced from \$3.7M to \$2.6M.

Requisition funding is 0 % of service revenue

Definitions for the 5-year Capital Plan

Asset Class	Asset class is used to classify assets for financial reporting in accordance with the Public Sector Accounting Board (PSAB) 3150.
	L - Land
	S - Engineering Structure
	B - Buildings
	V - Vehicles
	E - Equipment
Capital Expenditure Type	Capital expenditure type is used for reporting on asset investments and may be used to justify operational needs for a service.
	Study - Expenditure for feasibility and business case report.
	New - Expenditure for new asset only
	Renewal - Expenditure upgrades an existing asset and extends the service ability or enhances technology in delivering that service
	Replacement - Expenditure replaces an existing asset
Carryforward	Represents the carryforward amount from the prior year capital plan that is remaining to be spent. Forecast this spending over the next 5 years.
Funding Source	Debt - Debenture Debt (new debt only)
	ERF - Equipment Replacement Fund
	Grant - Grants (Federal, Provincial)
	Cap - Capital Funds on Hand
	Other - Donations / Third Party Funding
	Res - Reserve Fund
	WU - Water Utility
	If there is more than one funding source, additional rows are shown for the project.

Project Number 16-06 Capital Project Title Replacing of Small Equipments Capital Project Description Replacing of Small Equipments

Project Rationale Replacement of small equipments that have reached their end of life

Project Number 17-01 Capital Project Title Gas & Leachate Collection Pipe Extension Capital Project Description Gas & Leachate Collection Pipe Extension

Project Rationale To meet BC Ministry of Environment regulations, gas wells and leachate collectors are installed in each lift of refuse and have to be connected to the existing header system to collect methane gas. Well heads, valves, condensation traps, monitoring points, and piping has to be installed to each gas well and leachate collector. The gas is then conveyed to the gas plant, and the leachate is conveyed to the lined storage lagoons and then discharged into the municipal sewer. Cost estimate is derived from historical construction information and includes consulting costs to layout pipe design/headers.

Project Number 17-02 Capital Project Title Aggregate Production for Internal Use Capital Project Description Aggregate Production for Internal Use

Project Rationale Producing aggregate annually from shot rock that was quarried to make airspace provides the CRD with a number of benefits including: prolonging the landfill life (creating landfillling airspace), providing aggregate for on-site needs, effective interception of shallow groundwater inflows, cost and space savings by not having to import aggregate, and reduced social and environmental impacts by not having to truck in aggregate. Cost estimate is derived from historical tender data.

Project Number 17-04 Capital Project Title Progressive Closure of External Faces Capital Project Description Progressive Closure of External Faces

Project Rationale As specified under the BC Ministry of Environments Landfill Criteria for Municipal Solid Waste, completed landfill areas and slopes must be closed with a progressive closure system on an annual basis. The closure system consists of a clay or synthetic cover placed over a gravel drainage layer This progressive closure system stays in place until economies of scale makes it cost effective to proceed with installation of a final closure system. The completion of Cell 3 in 2025/2026 requires closure of the areas that will not be filled against going forward.

Project Number 17-07 Capital Project Title Computer Equipment Capital Project Description Computer Equipment

Project Rationale Replacement of computer equipment due to end of life cycle

Project Number 17-09 Capital Project Title Vehicle Replacements Capital Project Description Vehicle Replacements

Project Rationale Replacement of vehicle due to end of life cycle

Service: 1.521 **Environmental Resource Management Project Number 18-01** Capital Project Title Interim Covers Capital Project Description Interim Covers - West and North Slopes Project Rationale Following Golder's Leachate Management Plan, once an active landfilling cell is completed, but hasn't reached future filling contours, tarping is required to shed rainwater and divert to the freshwater collection system to prevent it from entering the leachate collection system and overwhelming the leachate storage ponds. Cost estimate is derived from historical in-house cost data. Capital Project Title Sedimentation Pond Relining Capital Project Description NW Sedimentation Pond Relining & Expansion **Project Number 22-01** Project Rationale To prevent leakage and fines from migrating off site into the north freshwater drainage area, the sedimentation pond must be relined. In addition the sedimentation pond must be enlarged to meet MOE requirements for retaining 24 hrs of precipitation from a 100 year storm event. Finally, the sedimentation pond requires inlet valving and piping to permit flows to be diverted to the upper lagoon in the event there is an onsite spill that must be contained and diverted from fresh water courses. **Existing Manual and Commercial Scale Existing Manual and Commercial Scale** Capital Project Title Upgrades Capital Project Description Upgrades Project Number 23-05 Project Rationale The South Entrance Commercial scale approach/exit ramps are in poor condition. This project includes sawcutting and removal of old scale ramps and pouring new concrete with Rebar to eliminate further safety hazards to trucks and employees. The South Entrance Manual Scale deck is in poor condition. It requires replacement and/or major repair. This project accounts for all work that needs to be done after detailed assement to ensure life of the existing manual and commercial scales can continue reliably for the next 20 years. Capital Project Description Capital Project Title Cell 5&6 GRW Project Number 24-01 Project Rationale This project will allow for the construction of a new mounded structural earth berm north of cell 1&2 at 5 corners intersection to serve as the new toe of cells 5 & 6. As part of this berm, the project includes installation of a critical sub-grade landfill leachate containment system (grout wall/curtain) and raising the clay containment berm from 130mAsI to 135mASL to ensure leachate capture from future landfill cells 4,5 & 6. The project also includes relocation of any existing infrastructure (LFG, Leachate, Water, electrical etc) that currently resides in the future footprint of the MSE berm. Capital Project Title Hartland North Master Plan Capital Project Description Hartland North Master Plan Project Number 24-02

Project Rationale With the recent completion of the new Residuals Treatment Facilty and associated access and new scales at Hartland North, this design project will ensure that there is adequate future planning and integration

with the existing landfill site

Project Number 24-03 Capital Project Title Hartland Amenity Project Capital Project Description Hartland Amenity Project

Project Rationale This project considers all road and dintersection improvements necessary to move commercial access from Hartland Avenue to Willis Point Rd.

Project Number 24-05 Capital Project Title Cell 5 Liner Construction Capital Project Description Cell 5 Liner Construction

Project Rationale A new drainage and liner system will ensure effective removal of leachate from within the new Cell 5 area and prevent any off site migration. The liner will also include an underdrain which will relieve pore pressure and ensure fresh ground water does not contribute to ongoing leachate collection and processing. Improvements include all temporary and permanent access road and related infrastructure to allow refuse to be deposited in Cell 5.

Project Number 24-07 Capital Project Title Relocation of N. Toe Road Sedimentation Pond Capital Project Description Pond Relocation of N. Toe Road Sedimentation Pond Relocation of N. Toe Road Sedimentation Pond

Project Rationale The North Toe Road fresh water sedimentation collection pond sits ontop of Cell 1 garbage. The future Gravity Retaining Wall will be constructed ontop of the pond so it must be relocated.

Project Number 25-02 Capital Project Title North End Wheel Wash Capital Project Description North End Wheel Wash

Project Rationale This project accounts for a new commercial truck wheel wash system to be installed on the North End to ensure trucks don't track mud onto Willis Point Road. Project includes a temporary wheel wash needed until the final Cell 5 access roads are ready to be utilized.

Project Number 25-03 Landfill Gas capture to meet New Federal Regs Landfill Gas capture to meet New Federal Capital Project Title Regs Landfill Gas capture to meet New Federal Capital Project Description Regs

Project Rationale Environment & Climate Change Canada has released a proposed Landfill Methane Regulation that is expected to come into force in Q1/Q2 of 2024, with the intent of reducing fugitive landfill emissions across the country. The regulation sets thresholds for surface emissions at landfills emitting more than 10,000 tonnes of CO2e per year (Hartland exceeds this). Based on required monitoring events, any surface methane concentrations that exceed proposed levels require a corrective action plan and mitigation within a specified timeframe. Based on current surface emissions data, it is expected that Hartland will need to implement additional controls, improve gas collection, or repair infrastructure to reduce surface methane concentrations to achieve compliance with these proposed limits.

Project Number 25-04 Hartland Operating Certificate Renewal
Capital Project Title Hartland Operating Certificate Renewal
Capital Project Title Capital Project Description

Hartland Operating Certificate Renewal
Capital Project Description

Project Rationale Hartland's Operating Certificate (OC) has not been modified since January 27, 2010. CRD has committed to updating its OC in light of recent MOE diuscussion and approval of ERM's SWMP. This project covers staff time and consultant/legal fees to assist the CRD in updating the OC with the MOE.

Hartland Leachate Pipe Mods for Pigging Project Number 25-05 Capital Project Title Hartland Leachate Pipe Mods for Pigging Capital Project Description

Project Rationale Leachate design, materials and installation to modify the leachate piping between HB-15 and the new RTF Centrate Line to reinstate pigging of the section of pipe between HB-15 and the Centrate return line).

Cell 4, 5A & 5B Construction Field QA/QC
Project Number 25-07

Cell 4, 5A & 5B Construction Field QA/QC
Capital Project Title

Cell 4, 5A & 5B Construction Field QA/QC
Capital Project Description

Project Rationale Cell 4, 5 and 6 and related incfrastructure construction will occur over multiple years. The project requires that the engineer of record be onsite during critical milestones throughout the construction project to ensure the construction is installer per the design. The original design budget contemplated a 1 year installation of all capital improvements for Cell 4, 5 & 6 projects. However, logistics and filling plans required phasing of the projects over a number of years which stretches the QA/QC budget over a longer period. The funds are to allow all travel, coordination meetings, onsite QA/QC field review, design modifications etc required to ensure construction meets the design requirements.

Project Number 25-11 Capital Project Title Hartland Environmental Montoring and Containment Projects Capital Project Secretary Containment Projects

Capital Project Description Containment Projects

Project Rationale To ensure compliance with BC Ministry of Environment regulations, an active review of current and future environmental controls is necessary. This project accounts for consultant studies, contractor environmental mitigation controls required to review and enhance the current environmental monitoring program at the Hartland landfill and ensure compliance with MOE regulations.

Project Number 26-01 Capital Project Title Drain Capital Project Description Capital Project Description Drain Capital Project Description Capital Project Description Drain

Project Rationale To meet BC Ministry of Environment regulations, gas wells and leachate collectors are installed in each lift of refuse and have to be connected to the existing collection systems to collect methane gas. Well heads, valves, condensation traps, monitoring points, and piping has to be installed to each combination gas well and leachate collector. The leachate is then conveyed to the lined storage lagoons and then discharged into the municipal sewer. Estimate is derived from historical costs.

Project Number 26-02 Capital Project Title Hartland 5 year DOCP update Capital Project Description Capital Project Description

Project Rationale Hartland's Operating Certificate (OC) issued by the BC Ministry of Environment requires adherance to the BC Landfilling criteria which requires updates to the Landfill DOCP every 5 years. The last DOCP was finalized and submitted to the MOE on May 2022. A new update is required by May 2027. The project includes the procurement of a consultant to complete the DOCP to meet submission requirement.

Project Number 26-03 Capital Project Title ERM Land Acquisition Capital Project Description ERM Land Acquisition

Project Rationale ERM's long term plan to maximize recycling and diversion opportunities for the region requires the acquisition of land/facilities to accommodate the growing needs of the region. This project includes those activities needed to secure land or facilities for future diversion, recycling or waste management requirements of the region.

Project Number 26-04 Capital Project Title RTF Biogas Tie-In to RNG Capital Project Description RTF Biogas Tie-In to RNG

Project Rationale The Residual Solids Treatment facility currently reuses the biogas produced during operation to minimize energy requirements for the facility. However there remains an excess of biogas that is currently flared and contributes to the CRD's carbon footprint. There is opportunity to divert the unused gas to Hartland's newly constructed Renewal Natural Gas plant for to purify the gas and sell it to Fortis over its 20 year sale agreement with the CRD. This project includes the design, procurement and installation of all infrastructure needed to take advantage of this opportunity.

Project Number 26-05 Capital Project Title Exising Utilities - Relocate for Cell 5 Capital Project Description Exising Utilities - Relocate for Cell 5

Project Rationale Buildout of the landfill includes the installation of a new toe-berm to maximize airspace in Phase 2. The toe berm will be 10-15meters high. There are a number of utilities (landfill gas, leachate, water, electrical, waste water, surface water etc) that cross through the footprint of the toe berm. These pipes need to be protected or relocated to handle the weight of earth and refuse that will be piled ontop of them. This project includes all design and construction required to protect and/or relocate existing landfill infrastructure that sits within the footprint of the new earthen berm. It also includes any new infrastructure that will be needed to be constructed to ensure continuous service of those utilities to the landfill.

Project Number 26-06 Capital Project Title Landfill Gas Wellfield Optimization Capital Project Description Landfill Gas Wellfield Optimization

Project Rationale This project includes all upgrades/optimizations to the landfill gas wellfield collection system to increase the collection efficiency, maximize RNG revenue potential and minimize the operating expenses needed to operate the wellfield in light of the new RNG facility commissioned in 2025.

Project Number 26-07 Capital Project Title NW Vegetation Buffer Capital Project Description NW Vegetation Buffer

Project Rationale A section of land abutting Mount Work requires vegetation to meet the BC Landfill criteria "sight" buffer of 30-50meters along the Western property boundary. This project includes the design and construction needed to relocate ~25,000m3 of shot rock, hillside shaping, stripping and landscaping to create a vegetion buffer that meets the criteria.

Project Number 26-08

Capital Project Title Surface Water Retention Pond - 100 year

Capital Project Description Surface Water Retention Pond - 100 year

Project Rationale The Landfill Criteria states that a landfill shall have the capacity to contain the surface water runoff generated in 24 hours of a 100 year precipitation event. This project covers the cost to design and build a new surface water retention pond to fulfill this criteria. This project includes the piping systems in/out of the pond to the receiving environment and/or leachate lagoons.

Project Number 26-09

Capital Project Title HB-13 Generator and Electrical Pole

Capital Project Description HB-13 Generator and Electrical Pole

Project Rationale The Electrical pole at HB-13 and backup generator have reached their useful life and require replacement. This project includes all cost to design, procure and construct the electrical replacement of this infrastructure.

Project Number 26-10

Capital Project Title Gr. Road Recycled Asphalt Milling - Dust

Capital Project Description Gr. Road Recycled Asphalt Milling - Dust

Project Rationale The roads around the landfill are mainly gravel and require constant maintenance and dust suppression. This project covers the cost of receiving recycled asphalt and deploy it on the gravel roads around the site in order to reduce maintenance and dust suppression activities.

Project Number 26-11

Capital Project Title Hartland 2100 Planning / Consultation /

Capital Project Description Hartland 2100 Planning / Consultation /

Project Rationale Construction efforts on Phase 3 will need to occur 15-20 years prior to the needing the airspace due to the large volume of rock that is required to be removed. Getting approval to construct will require numerous years of planning and consultation with the ministry and stakeholders. This project covers the cost of any fees, staff time, consultation, events, permits, reports, assessments and other costs that are required to initiate the planning phase, well in advance of construction needing to start.

1.521 Enviromental Resource Management Capital Reserve Fund Schedule - ERM 2026 - 2030 Financial Plan

Capital Reserve Fund Schedule - ERM

Capital Reserve Fund ERM - Landfill Closure Portion, Capital Reserve Portion, and Recycling Depots Portion

Capital Reserve Fund Schedule

Bylaw 2164 established a Solid Waste Refuse Disposal Reserve Fund for the ERM Service (was called Solid Waste Service). There are three portions in the Reserve Fund: Landfill Closure, restricted funds to cover the liability of closing Phase 2 - 3 and post-closure maintenance. Capital Reserve is working capital and not restricted.

Landfill Closure Portion	Estimate			Budget		
Fund: 1020 Fund Centre: 101363	2025	2026	2027	2028	2029	2030
Beginning Balance	14,271,342	14,885,564	14,349,786	8,823,293	6,306,269	6,798,906
Planned Capital Expenditure (Based on Capital Plan)	-	(1,000,000)	(6,000,000)	(3,000,000)		
Transfer from Ops Budget	464,222	464,222	473,506	482,977	492,636	502,489
Interest Income*	150,000	-	-	-	-	-
Ending Balance \$	14,885,564	14,349,786	8,823,293	6,306,269	6,798,906	7,301,394

Assumptions/Background:

Liability reserve to fund closure of Phase 2-3 and post closure maintenance.

^{*} Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

Capital Reserve Fund Schedule

Capital Reserve Portion	Estimate			Budget		
Fund: 1020 Fund Centre: 101364	2025	2026	2027	2028	2029	2030
Beginning Balance	9,794,032	7,865,903	4,760,903	2,380,903	1,100,903	1,600,903
Planned Capital Expenditure (Based on Capital Plan)	(4,750,000)	(3,575,000)	(2,850,000)	(1,750,000)		
Transfer to/from Ops Budget	2,621,871	470,000	470,000	470,000	500,000	470,000
Interest Income*	200,000	-	-	-	-	-
Ending Balance \$	7,865,903	4,760,903	2,380,903	1,100,903	1,600,903	2,070,903

Assumptions	Background:

^{*} Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

Capital Reserve Fund Schedule

Recycling Depots/Compost Center Reserve Portion	Estimate	Budget							
Fund: 1020 Fund Centre: 102102	2025	2026	2027	2028	2029	2030			
Beginning Balance	19,918	23,918	27,918	31,918	35,918	39,918			
Planned Capital Expenditure		-	-	-	-	-			
Transfer to/from Ops Budget	4,000	4,000	4,000	4,000	4,000	4,000			
Ending Balance \$	23,918	27,918	31,918	35,918	39,918	43,918			

Assumptions/Background:

Reimburse operating budget for capital expenditures spent by Compost Center.

1.521 Environmental Resource Management Operating Reserve Summary 2026 - 2030 Financial Plan

Profile

Enviromental Resource Management

Bylaw 3867 - established Operating Reserve for the ERM Service to be used by the service for: mitigating fluctuations in tipping fee revenue and for covering operational expenditures as required, including debt servicing.
