

**NOTICE OF MOTION TO CAPITAL REGIONAL DISTRICT REGIONAL PARKS COMMITTEE
MEETING OF FEBRUARY 21, 2018**

SUBJECT **Development Application Adjacent to Gonzales Hill Regional Park**

ISSUE

This report provides recommendations relating to a Board of Variance application and referral received by the Capital Regional District in relation to the property at 1980 Fairfield Place in the City of Victoria, adjacent Gonzales Hill Regional Park.

BACKGROUND

Gonzales Hill Regional Park is the only regional park located within the City of Victoria and District of Oak Bay, comprised of 2 hectares of land straddling the boundary of these two municipalities. While Victoria and Oak Bay residents represent 27% of the regional population, and pay approximately 1/3rd of total regional parks operating expenditures and acquisition funds, they are served by a regional park inventory that represents approximately 0.015% of the total land base of the regional parks system.

As a result, development of property adjacent to Gonzales Hill Regional Park can have a relatively greater impact on local residents when compared to changes in proximity to regional parks in other municipalities, where the inventory of regional park land is substantially larger.

In light of requests received from Victoria and Oak Bay residents, asking the Regional Parks Committee to provide comment to the City of Victoria Board of Variance on the application for the property at 1980 Fairfield Place, adjacent to Gonzales Hill Regional Park, it is recommended that the Regional Parks Committee recommend that the Board provide the following comments on the application, to supplement comments provided by CRD staff.

RECOMMENDATION

1. That the Regional Parks Committee recommend that the Board provide the following comments to the City of Victoria Board of Variance in relation to the property at 1980 Fairfield Place, adjacent Gonzales Hill Regional Park, to supplement comments provided by CRD staff:
 - a. Gonzales Hill Regional Park is the only regional park located within the boundaries of the City of Victoria and District of Oak Bay, comprised of 2 hectares of land serving a population of 103,000 people (27% of the regional population, with 0.015% of the land base of regional parks located within these municipal borders).
 - b. The requested variance to increase the total floor area of each floor in the building will substantially affect the use and enjoyment of the general public accessing Gonzales Hill Regional Park, due to the proximity of the subject parcel to the park boundary, the prominent location of the building site adjacent to the park boundary, and the small size of the park, by permitting a larger building with a larger upper floor, and therefore greater massing adversely effecting the public's use and enjoyment of the regional park.

- c. The requested variance to the total floor area of the building will adversely affect the natural environment in the immediate vicinity of Gonzales Hill Regional Park, authorizing a building with a larger footprint than is permitted under the existing zoning, and which will have a correspondingly greater encroachment on the biological diversity of this natural area.
- d. As per section 542(1)(c) of the Local Government Act, the Board of Variance may only grant a minor variance if is of the opinion that the variance does not:
 - (ii) adversely affect the natural environment;
 - (iii) substantially affect the use and enjoyment of adjacent land.

Submitted by:	Director Ben Isitt, Victoria
Concurrence:	Alternate Director Pamela Madoff, Victoria
