

MOTION WITH NOTICE
WEDNESDAY JUNE 12, 2019

SUBJECT Innovative South Island Transportation Ideas

BACKGROUND

The Province is currently developing a multimodal transportation strategy for the south island. The CRD is engaged as a partner in this work, beginning with a report from the consultants to the Transportation Committee at a recent meeting.

The Victoria Transport Policy Institute is a local think tank that develops evidence-based policy proposals. Two such policy proposals are attached to this report for the Transportation Committee's consideration.

The recommendation is *not* that the Transportation Committee undertake the recommended proposals. The recommendation is that the Transportation Committee recommend to the CRD Board that the Board forward these proposed policies to the Province to be included for consideration in the range of solutions that the Province will be developing. The point of doing this through the Transportation Committee and the Board is to signal to the Province that the CRD thinks that these are two policy solutions worthy of consideration by the Province.

RECOMMENDATION

That the CRD Board forward the attached policy proposals to the Province for consideration as part of the South Island Multi-modal Transportation Strategy.

Respectfully submitted,

Director Helps
