

Appendix D: Infrastructure Funding History

EQUAL OPPORTUNITY WITHIN ICIP

Fair access within CRD services was assessed under ICIP as a whole.

SSI has one project being considered for Rural and Northern Communities (RNC) and CCR. In order to consider fair distribution, SSI Maliview Wastewater Treatment Plant is being recommended for the RNC Stream if the decision is to submit one application.

There is currently no outstanding application for a regional and sub-regional service.

Below is our historical submission.

2018/19

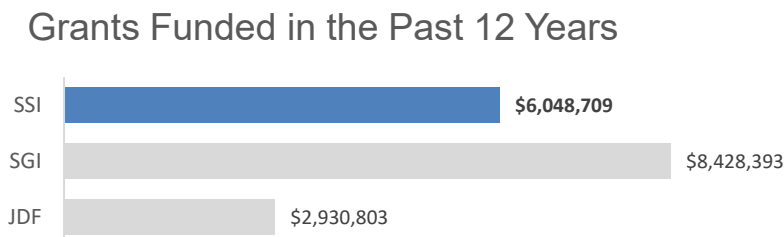

1. RNC Program Stream
 - a. SGI – Miners Bay Dock at Mayne Island
 - b. JDF – Wilderness Mountain Supply Improvement
2. Community, Culture, & Recreation (CCR) Program Stream
 - a. SSI – Fernwood Playing Field
 - b. SGI – Mayne Island Regional Trail
3. Green Infrastructure - CleanBC Communities Fund Program Stream
 - a. Hartland Landfill – Renewable Natural Gas Initiative

2019/20

4. Green Infrastructure – Environmental Quality Program Stream
 - a. JDF – Anderson Cove Water Distribution
 - b. SGI – Magic Lake Estates Wastewater System Renewal

EQUAL OPPORTUNITY TO GRANT ACCESS

Grant programs aim to provide a fair distribution of grant funding. As such, previous grant awards are taken into account in the assessment of applications. The graph below shows comparable infrastructure grants awarded to Electoral Areas (excluding Disaster Mitigation) from 2008-2020.

Historically, JDF has been awarded the least amount of funding, but there are no project applications put forth under JDF for CCR.

SSI Maliview Wastewater Treatment Plant is being recommended for the RNC Stream in ICIP.

ICIP GRANT APPLICATION AND PROGRAM ANALYSIS

Below are key facts for consideration:

Community, Culture, and Recreation Stream:

1. Elk Beaver Lake Oxygenation System
 - a. The lakes do not meet provincial and federal guidelines for recreational water quality
 - b. The purchase and installation of the recommended oxygenation system at Elk Beaver Regional Park will remediate water quality so that will not only increase and improve the quality of public recreational use but will also build resiliency and sustainability into these lakes in the face of climate change.
2. Panorama Energy Recovery Project
 - a. A better alignment with the program outcomes under CleanBC Communities Fund-ICIP (deadline November 12, 2020).
3. SSI: Fernwood Elementary School Athletic Field Upgrades
 - a. This application has been submitted previously in 2019 and was declined.
 - b. SSI Maliview Wastewater Treatment Plant is being recommended for the RNC Stream in ICIP.
