Notice of Motion: Academic Review - Land Application of Biosolids (Director Desjardins)

[At the June 21, 2023 Environmental Services Committee, the following notice of motion was given same-day consideration and carried:]

The Environmental Services Committee recommends to the Capital Regional District Board:

That staff report back with a proposal that CRD Environment Service fund University of Victoria or other suitable independent academic institution to prepare a review:

- a) of available literature, to determine whether there are validated examples and/or peer reviewed papers assessing the risks of the application of biosolids on environmental and human health, and
- b) based on this and on The Precautionary Principle, whether CRD may have a legal liability for such application. The institution may receive submissions from the public.
