### Organics Processing Next Steps

That the Environmental Services Committee recommends to the Capital Regional District Board:  
That the Capital Regional District continue with the status quo of hauling and processing organics to private sector facilities on lower/mid-island, and signal to the market, through this resolution, that should the private sector establish an in-region facility, the Capital Regional District would consider working with municipalities to commit feedstock, pending pricing, greenhouse gas reductions, odour, location, and other environmental considerations.
